

“FlagMo2E” is raw data saved from flashing dot trials

“FlagMo2H” is raw data saved from moving dot field trials

Different files under the same name are from different times during these sessions
(timestamped in the title)

The relevant columns for these are labeled in the .mat files but the ones we are focused on are:

- X position
- Y position
- Time
- Pupil width

The vpx file has the data from the eye tracker with similar variables but includes different time stamps.
